the highlight in the life of the second-richest man might be the daring commando mission he directed

for example, 4 of 5 patients diagnosed with FMS and put on testosterone therapy for at least 2 months, responded overall with significantly improved quality of life

this painful history was shared by the UK (among others) over pertussis (whooping cough) in the 1970s

by 1950, 26,000 American psychiatric patients had been sterilized, 11,000 of them
